SARS-CoV-2 Antibody, IgG

TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
-------	--------	------	-------	--------------------	-----

<b>SARS-CoV-2 Antibody, IgG</b> <sup>A</sup>	Positive			Negative	01
--	----------	--	--	----------	----

Results suggest recent or prior infection with SARS-CoV-2. Correlation with epidemiologic risk factors and other clinical and laboratory findings is recommended. Serologic results should not be used as the sole basis to diagnose or exclude recent SARS-CoV-2 infection. False positive results infrequently occur due to prior infection with other human Coronaviruses.

This assay was performed using the Abbott SARS-CoV-2 IgG assay.

**Comments:**<sup>A</sup> This test has not been reviewed by the Food and Drug Administration.

SARS-CoV-2 Antibody, IgG

TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
<b>SARS-CoV-2 Antibody, IgG</b>					
SARS-CoV-2 Antibody, IgG <sup>A</sup>	See Euroimmun SARS-CoV-2 Ab, IgG			Negative	01
Euroimmun SARS-CoV-2 Ab, IgG <sup>A</sup>	Equivocal			Negative	01

Equivocal results may be consistent with early development of antibodies or waning antibodies after infection with SARS-CoV-2. Repeat testing at a later date is recommended. Correlation with epidemiologic risk factors and other clinical and laboratory findings is recommended. Serologic results should not be used as the sole basis to diagnose or exclude recent SARS-CoV-2 infection. False positive results infrequently occur due to prior infection with other human Coronaviruses. This assay was performed using the Euroimmun SARS-CoV-2 IgG assay.

SARS-CoV-2 Antibody, IgG

TESTS	RESULT	FLAG	UNITS	REFERENCE INTERVAL	LAB
<b>SARS-CoV-2 Antibody, IgG</b>					
SARS-CoV-2 Antibody, IgG <sup>A</sup>	See IDK SARS-CoV-2 Ab, IgG			Negative	01
IDK SARS-CoV-2 Antibody, IgG <sup>A</sup>	Negative			Negative	01

This sample does not contain detectable SARS-CoV-2 IgG antibodies. This negative result does not rule out SARS-CoV-2 infection. Correlation with epidemiologic risk factors and other clinical and laboratory findings is recommended. Serologic results should not be used as the sole basis to diagnose or exclude recent SARS-CoV-2 infection. This assay was performed using the Epitope Diagnostics (IDK), Inc. Novel Coronavirus COVID-19 IgG assay.
